

## **FOR IMMEDIATE RELEASE**

### **ENTROPIA UNIVERSE INTRODUCES CITIZENSHIP AND REVENUE SHARING SYSTEM WITH EXPECTED ANNUAL RETURNS OF UP TO 30%**

**Gothenburg, Sweden – November 16, 2011 /MindArk/** – MindArk, developer and publisher of the largest real money MMO, announced today that it will introduce a groundbreaking Citizenship System to Planet Calypso. The new system will provide revenue sharing to participants, and add a political system that will allow players to vote on major decisions affecting their virtual world, all for as little as \$100 USD.

“Our new Citizenship System will have a strong impact on the social and Virtual Worlds industry”, said Jan Welter Timkrans, Chairman of MindArk. “People have always had the opportunity to make money playing our game and engaging in the micro transactions economy. Now they can actually share in the revenues of their favorite planet with a Land Lot deed and help decide its future via the political system.”

The new system grants users Planet Calypso citizenship and political voting rights. Citizens will also receive a share in the Planet Partner gross revenue of Calypso, paid weekly. Based on Planet Calypso’s performance over the last 12 months, the potential return of investment (ROI) is expected to be between 27% and 30% per year. Each planet in the Entropia Universe is a separate Planet Partner, and the revenue share paid to deed holders will come from the Planet Calypso revenue stream. Sixty thousand land lot deeds offered at \$100 USD each are available exclusively through the Entropia Universe global auction and can be acquired by anyone after creating a free avatar.

The new Citizenship System will showcase the economics of a successful Planet Partner on the Entropia Universe platform, and allow users to participate in that success. Planet Calypso is the oldest of the planets in Entropia Universe, with over one million registered accounts and over \$400 million USD per year in user-to-user transactions. Until now, possessing land in Entropia

Universe has been very exclusive, with the market price for land deeds ranging from \$5,000 to upwards of \$500,000 USD. In the new Citizenship System, just about anyone can share a piece of an entire virtual world.
